

Meeting Every Queue Management Need

CD10L

Counter Display

CD10L is a compact and modern looking colour LCD panel for displaying called number at the service counter. Its aesthetic construction makes it easy to blend with any office decor. It can be mounted directly on a wall, fixed on to the table top or suspended from ceiling.

CD10L can function in two distinct modes.

- Serves as a compact display by showing the called number and the counter number to the waiting customers. The integrated speakers produce a chime tone to alert the customers whenever a number is displayed.
- Acts as a compact digital signage to display preloaded contents. The contents are stored in the local storage media and can be advertisements or corporate information. This mode is activated automatically when the display has been idle for a preset time.

Features

- High quality screen image
- Display can be customised to use corporate colours
- Multilanguage capability
- Support alphanumeric display
- Integrated speakers with multiple sound options
- Digital signage capability
- User programmable contents
- LAN or wireless connectivity

Technical Specifications*

Parameter	Description
